ABOUT ME

Innovative Full-Stack Software Engineer with 6+ years of experience designing, architecting, and scaling high-performance web applications and cloud microservices. Proficient in modern JavaScript/TypeScript, React, Node.js, and distributed system architectures with a passion for code quality and accessibility.

EDUCATION

B.S. Computer Science
University of California, Berkeley
2014 — 2018

AWS Certified Solutions Architect
Amazon Web Services
2021

CORE SKILLS

- TypeScript / JavaScript
- React & Next.js
- Node.js / Express
- Python & FastAPI
- PostgreSQL & Redis
- Docker & Kubernetes
- AWS Cloud Architecture
- CI/CD Pipelines
- GraphQL & REST APIs

LANGUAGES

English: Native / Bilingual

Spanish: Conversational

Japanese: Elementary

WORK EXPERIENCE

Lead Software Engineer
2021 — PRESENT

Nexus Cloud Technologies • San Francisco, CA

- Architected and deployed enterprise microservices serving 4.5M+ active users with 99.98% service uptime.
- Mentored a distributed engineering pod of 8 engineers across frontend, backend, and DevOps domains.
- Reduced cloud infrastructure costs by 22% through container orchestration tuning and cache optimization.

Full-Stack Developer
2018 — 2021

Catalyst Digital Media • San Francisco, CA

- Built real-time collaborative workspace features using React, WebSockets, and Node.js.
- Redesigned user onboarding flow, boosting 30-day conversion rate by 17.5%.
- Authored automated integration test suites increasing codebase coverage from 62% to 91%.

KEY PROJECTS

Open Source Micro-ORM
2022

Creator & Lead Maintainer (2,400+ GitHub Stars)

- Engineered zero-dependency TypeScript ORM with compile-time type validation.

Real-Time Telemetry Dashboard
2020

Nexus Cloud Internal Tooling

- Developed high-throughput metrics ingestion system handling 50k events/sec.
