PROFILE

Innovative Front-End Engineer with 6+ years of experience crafting high-performance, accessible, and responsive digital web applications. Expert in translating complex UI/UX designs into pixel-perfect modular code. Proven track record leading front-end architecture and collaborating across cross-functional product teams.

WORK EXPERIENCE

2020 PRES

SENIOR FRONT-END ARCHITECT

Apex Digital Systems | San Francisco, CA

- Architected scalable React/TypeScript web apps serving 1.5M+ active monthly users with 99.9% uptime.
- Reduced initial bundle load time by 42% through code-splitting, lazy loading, and asset optimization.
- Mentored 6 junior engineers and established automated code formatting and Jest/Playwright testing.

2018 2020

FRONT-END DEVELOPER

CloudPulse Technologies | San Jose, CA

- Built responsive customer analytics dashboards with dynamic D3/Chart.js interactive visualizations.
- Collaborated closely with product designers to implement WCAG 2.1 AA accessibility standards.
- Refactored legacy jQuery codebase to modern component-driven React architecture.

2016 2018

WEB DEVELOPMENT ASSOCIATE

Vanguard Web Labs | Oakland, CA

- Developed 20+ responsive e-commerce landing pages with high conversion rates.
- Integrated payment gateways and RESTful backend APIs seamlessly.
