

JORDAN REED

SENIOR CLOUD SYSTEMS ARCHITECT

jordan.reed@example.com | +1 (555) 345-6789 | San Francisco, CA | linkedin.com/in/jordan-reed

PROFESSIONAL PROFILE

High-performing Cloud Systems Architect with 8+ years designing scalable, fault-tolerant cloud platforms and infrastructure automation. Adept at driving multi-cloud adoption, containerization, and modern DevSecOps practices across distributed global engineering teams.

WORK EXPERIENCE

Principal Cloud Architect

2021 — PRESENT

Stratosphere Enterprise Cloud • San Francisco, CA

- Architected zero-trust multi-region Kubernetes platform across AWS and GCP supporting 10M+ daily transactions.
- Led 14 senior engineers in designing GitOps deployment workflows, reducing production incident recovery time (MTTR) by 65%.
- Engineered automated Terraform infrastructure modules adopted across 32 engineering squads.

Senior Infrastructure Engineer

2018 — 2021

Vortex Software Systems • San Jose, CA

- Migrated legacy bare-metal infrastructure to containerized AWS microservices, lowering operational overhead by $340k annually.
- Implemented automated canary deployments and Prometheus/Grafana real-time observability dashboards.
- Authored security compliance documentation ensuring SOC2 Type II accreditation.

CERTIFICATIONS

- **AWS Certified Solutions Architect — Professional** (2022)
- **Certified Kubernetes Administrator (CKA)** (2021)

EDUCATION

B.S. Computer Engineering

Stanford University

2014 — 2018

TECHNICAL SKILLS

- AWS & Google Cloud Platform
- Kubernetes & Docker
- Terraform & Pulumi (IaC)
- CI/CD (GitHub Actions, ArgoCD)
- Go & Python Automation
- Prometheus, Grafana & Datadog
- Linux System Internals
- Network Security & VPNs

LANGUAGES

- **English:** Native
- **German:** Intermediate
